CDC GUIDANCE ON ASSESSING COMMUNITY RISK -- On February 25, 2022, CDC updated its mask guidance and created an online tool -- COVID-19 Community Levels -- to help communities and residents decide what prevention steps to take based on the latest data. Levels can be low, medium, or high and are determined by looking at hospital beds being used, hospital admissions, and the total number of new COVID-19 cases in an area. The graphic above is the result from checking COVD-19 Community Levels for Rochingham County NH. To use the tool go to the link above.
