SURGES IN FLU AND RSV AFFECTING SENIORS --For most healthy people, RSV, or respiratory syncytial virus, is a coldlike nuisance. But for the very young, the elderly and people with certain health problems, it can be serious, even life-threatening. The virus can infect deep in the lungs, causing pneumonia, and in babies it can impede breathing by infl aming tiny airways Several companies are creating RSV vaccines but Pfi zer and rival GSK are furthest along. Both companies plan to seek regulatory approval in the U.S. by the end of the year, as well as in other countries. **NHDHHS RECOMMENDS this season's FLU shots for everyone. The forumilation is proving effective against this year's strains and protective for all who have had limited exposure to flu over the past years of the pandemic.**
